

§ 19.355 Labels describing the spirits.

(a) Labels affixed to containers must accurately describe the spirits in the tanks from which the containers are filled. The proprietor's records must enable TTB officers to readily determine which label was used on any filled container.

(b) Additional information regarding labeling requirements is found in subpart T of this part and part 5 of this chapter.

(26 U.S.C. 5201)

§ 19.356 Alcohol content and fill.

(a) *General.* At representative intervals during bottling operations, a proprietor must examine and test bottled spirits to determine whether the alcohol content and quantity (fill) of those spirits agree with what is stated on the label or the bottle. A proprietor's test procedures must be adequate to ensure accuracy of labels on the bottled product. Proprietors must record the results of all tests of alcohol content and quantity (fill) in the record required by § 19.600.

(b) *Variations in fill.* Quantity (fill) must be kept as close to 100 percent fill as the equipment and bottles in use will permit. There must be approximately the same number of overfills and underfills for each lot bottled. In no case will the quantity contained in a bottle vary from the quantity stated on the label or bottle by more than plus or minus:

- (1) 1.5 percent for bottles 1.0 liter and above;
- (2) 2.0 percent for bottles 999 mL through 376 mL;
- (3) 3.0 percent for bottles 375 mL through 101 mL; or
- (4) 4.5 percent for bottles 100 mL and below.

(c) *Variations in alcohol content.* Variations in alcohol content, subject to a normal drop that may occur during bottling, must not exceed:

- (1) 0.25 percent alcohol by volume for products containing solids in excess of 600 mg per 100 ml;
- (2) 0.25 percent alcohol by volume for all spirits products bottled in 50 or 100 ml size bottles; or
- (3) 0.15 percent alcohol by volume for all other spirits and bottle sizes.

(d)

Example. Under paragraph (c) of this section, a product with a solids content of less than 600 mg per 100 ml, labeled as containing 40 percent alcohol by volume and bottled in a 750 ml bottle, would be acceptable if the test for alcohol content found that it contained 39.85 percent alcohol by volume.

(26 U.S.C. 5201, 5301)

§ 19.357 Completion of bottling.

When the contents of a bottling tank are not completely bottled at the close of the day, the proprietor must make entries on the bottling and packaging record covering the total quantity bottled that day from the tank. Entries must be made not later than the morning of the following business day unless the proprietor maintains auxiliary or supplemental records as provided in § 19.580.

(26 U.S.C. 5201)

§ 19.358 Cases.

(a) On completion of bottling, a proprietor must place filled bottles with properly affixed closures in cases. A proprietor may only fill cases with the same kind, size, and proof of spirits. Normally, the cases must be sealed; however, cases may be temporarily retained on bonded premises without being sealed pending the affixing to bottles of any required labels, State stamps, or seals. Unsealed cases must be marked in accordance with subpart S of this part, and segregated from other cases until sealed. All cases must be sealed and marked as provided in subpart S of this part before removal from the bonded premises.

(b) Filled bottles may remain on the bottling line at the end of the workday if the identical product will be bottled on the next bottling shift and if adequate security measures are in place to prevent theft.

(26 U.S.C. 5201, 5206)

§ 19.359 Remnants.

When at the end of a bottling run fewer bottles remain than the number necessary to fill a case, the remaining bottles may be placed in a case marked as a remnant case or kept uncased on the bonded premises until spirits of the
